A zenét több oldalról, sokféleképpen meg lehet közelíteni vizuálisan. A zenei hangot fizikailag három fő tulajdonsága alapján határozzuk meg: A hang magasságát és mélységét a rezgésének sebessége jellemzi. A hang erejét rezgésének amplitúdója határozza meg. A hangszín pedig a hang jellegét, karakterét adja meg a zenei felhangok által.

Elméleti szempontból három fő összetevő határozza meg a zenét. A ritmus, a dallam és a harmónia. Mindegyik tényező alapvető fontosságú a zenei szövetben. Én a ritmust emeltem koncepcióm fő motívumává, mivel ez a legalapvetőbb összetevő, amelyet szinte bárki megért, akár létre is tud hozni, például a kezével az asztalon dobolva. Tehát ez egy elemi komponens, mégis megérthető és átélhető mindenki számára.
